

**your roads – your team,
linking communities and families**

Mainroad Chinook Contracting LP

Mainroad Chinook Contracting has been contracted by Chinook Highway Operations Inc. – a partnership between SNC-Lavalin Operations & Maintenance Inc. and Acciona Concessions Canada (2008) Inc. The maintenance contract includes services such as road repair, snow-removal and lighting maintenance. The headquarters and main works yard for Mainroad Chinook Contracting are located in the Calgary community. Pre-operations commenced April, 2013 while maintenance operations are scheduled to begin October, 2013.

The Southeast Stoney Trail (SEST) Project is a public-private partnership (P3) between the Alberta Government and Chinook Roads Partnership. The SEST Project is one of the largest single P3 highway infrastructure projects in Alberta's history and construction of the Stoney Trail SE ring road is anticipated to be completed in late 2013.

The Mainroad Group operates four provincial highway maintenance contracts in British Columbia including two P3 contracts and is an employee owned company. SEST is Mainroad's first highway maintenance contract outside of British Columbia and our first engagement within Alberta. This contract represents a spring board for Mainroad to venture into other business opportunities in Alberta and elevates our P3 business portfolio.

The Southeast Stoney ring road is located in Calgary, Alberta, an urbanized and rapidly growing region with the highest concentration of people and communities in the province and a magnet for tourism.

Mainroad is an active member of the Alberta Road Builders & Heavy Construction Association (ARHCA) and Alberta Public Works Association. *Please view Mainroad Group Overview for a complete list of industry associations.*
